Aesthetic Facial Reconstruction

in Adults and Children Symposium

February 18 - 20, 2010
Tucson, AZ

AMERICAN SOCIETY OF
PLASTIC SURGEONS

Sponsored by the American
Society of Plastic Surgeons

Fresh Start 
Surgical Gifts

Support for this program is provided by a generous
educational grant from Fresh Start Surgical Gifts

Abstract Submission Deadline:
December 19, 2009

This program is intended for plastic surgeons, residents and fellows.

Facial reconstruction remains the cornerstone of plastic surgery. The face tells the world who we are and materially influences what we can become. Plastic surgeons have both the opportunity and responsibility to change a patient's life. This year's symposium will provide information on basic and complex facial repair.

Topics covered include:

- Complex military and civilian trauma
- Updates in anesthesia
- Facial plastic surgery/ENT
- Nasal fractures
- Facial fillers and their complications
- Effects of radiation therapy
- Thromboembolic prophylaxis
- Free flap technique

Detailed presentations with emphasis on nasal and ear reconstruction and repair of Mohs defects in all facial areas will provide comprehensive state-of-the-art information.

Abstracts for presentation on facial reconstruction topics are welcomed. The best abstract(s) will be recognized. Bring a difficult case for discussion with the faculty!

Interaction with faculty is encouraged through question and answer opportunities throughout the program.

Learning Objectives

At the conclusion of this activity, participants should be able to:

- Summarize the principles and planning associated with nasal and facial reconstruction
- Describe the current state of facial transplantation
- Discuss approaches to nasal and ear reconstruction
- Examine complex military and civilian trauma
- Practice with an increased awareness of related patient safety issues and concerns

Abstract Submission Deadline:

December 19, 2009

Attendees are encouraged to submit abstracts for presentation

Abstract presentations are limited to 1 page (5 minute presentation). Submit your 1 page abstract electronically to Frederick J. Menick, MD at facialabstractorcase@plasticsurgery.org (file size limited to 10 MB)

Fresh Start transforms the lives of disadvantaged children and young people with physical deformities through the gift of Fresh Start. Fresh Start accomplishes its purpose through a community of volunteers dedicated to providing the highest quality reconstructive surgery and related services.

Accreditation/Designation

The American Society of Plastic Surgeons® (ASPS®) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

ASPS designates this educational activity for a maximum of **21 AMA PRA Category 1 Credits™**. Physicians should only claim credit commensurate with the extent of their participation in the activity.  of the 21 credits have been identified as applicable to Patient Safety.

Disclosure Policy

The American Society of Plastic Surgeons (ASPS) requires all instructors, planners, reviewers, managers, and other individuals in a position to control or influence the content of an activity to disclose all relevant financial relationships or affiliations. All identified conflicts of interest must be resolved and the educational content thoroughly vetted by ASPS for fair balance, scientific objectivity, and appropriateness of patient care recommendations. The ASPS also requires faculty/authors to disclose when off-label/unapproved uses of product are discussed in a CME activity or included in related materials.

"I felt a tremendous urge to do something other than the surgery of destruction."

Harold Gillies, after seeing his first "plastic" operation while observing the French surgeon Morestin before WWI.

PROGRAM *(Each presentation will be followed by five minutes of Q/A)*

Thursday, February 18, 2010

7:00 am	Registration/Continental Breakfast/Exhibits
8:00 am	Introduction/Program Overview <i>Frederick J. Menick, MD</i>
8:15 am	ENT and Facial Plastic Surgery Update <i>George Murrell, MD</i>
8:40 am	Anesthesia Update <i>Dimitri Voulgaropoulos, MD</i>
9:05 am	A New Classification to Analyze Morbidity and Mortality after Plastic Surgery <i>Steven P. Davison, MD</i>
9:25 am	Advanced Digital Technologies in Head and Neck Reconstruction <i>Gordon H. Wilkes, MD</i>
9:50 am	Radiotherapy - Its Uses and Effects <i>David Frye, MD</i>
10:15 am	Break/Exhibits
10:45 am	Reconstruction in the Irradiated Field <i>Lawrence J. Gottlieb, MD</i>
